

**GEODESIC TENSEGRITY  
SYNERGETIC FRACTAL  
RESEARCH**

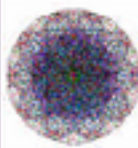

Investigating the **synergy** of our Natural World using 12 dimensional computation of **Golden Phi** Entanglements

Describing **macro—micro—nano scale** high frequency geodesic event processes of **natural entangled ratios** of fractals

Development of rational entangled fractal algorithms of **natural Growth** processes within a **12 dimensional isotropic vector matrix**

Replacement of infinitesimals, irrationals, transpositions, rounding functions, and system closures with discrete **packetized fractal entanglements of Phi**

**FRACTALNET**
